Do you feel sick?

STOP

You may have the flu if you have fever or chills AND a cough or sore throat.

You may also have a runny nose, body aches, a headache, tiredness, diarrhea, or vomiting.

If you think you have the flu, stay home or in your residence, except to get medical care.

For more information visit www.flu.gov or call 1 (800) CDC-INFO (232-4636).
